

# Nutanix Cloud Clusters (NC2) on OVHcloud®

Nutanix Cloud Clusters (NC2) on OVHcloud delivers a seamless hybrid multi-cloud experience directly from the My Nutanix portal. Combine the full power of the Nutanix Cloud Platform (NCP) with OVHcloud's high-performance, dedicated infrastructure, and extend your Nutanix environment to the cloud with no refactoring, unified management, predictable economics, and no egress fees.

## Power hybrid multi-cloud with dedicated infrastructure

**Seamless Hybrid Multi-Cloud Integration**  
Deploy and manage NC2 directly from the My Nutanix portal with a single interface across on-prem and OVHcloud environments.

**Dedicated Infrastructure with Built-In Cloud Advantages**  
Run NC2 on Nutanix-qualified OVHcloud SCALE and HGR-HCI bare metal servers with excellent price-to-performance and workload isolation.

**Smart Cost Control**  
No ingress or egress charges, transparent pricing, and flexible subscription or BYOL options to optimize total cloud spend.

**Unified Nutanix Experience**  
Full access to the Nutanix Cloud Platform (NCP) via Prism and Nutanix Central. No new tools or retraining.

**Rapid Deployment & Simplified Scaling**  
Pre-deployed clusters allow you to scale quickly to support growth, DR, or seasonal bursting.

**Built-In Security & Network Performance**  
Leverage OVHcloud's private vRack networking, monitored hosts, and built-in anti-DDoS protection for secure, high-bandwidth hybrid connectivity.

## Choose your solution

### Packaged Service

- All-in-one private cloud platform
- Three options: Starter, Pro or Ultimate packs
- Pre-installed NCP software licenses
- Ready-to-use Nutanix cluster

### BYOL Service (Bring Your Own License)

- Full portability of existing Nutanix licenses
- Ready-to-use Nutanix cluster
- Pre-deployed quickly

## Widest range of Nutanix-qualified servers on the market

<b>Cores</b>	16	←→	48
<b>Memory</b>	128Gbps	←→	1.5Tbps
<b>Stores</b>	7.68Tbps	←→	92.16Tbps
<b>Ingress/Egress</b>	Up to 50Gbps unmetered		

	Azure	AWS	OVHcloud
Number of Configurations	2	7	147
Egress Traffic at 50TB of Data	\$4350	\$4500	Free
Entry Level Price (Per Node with License)	\$5036	\$4506	\$1478
Service Level Agreement (SLA)	99.9%	99.5%	99.95%

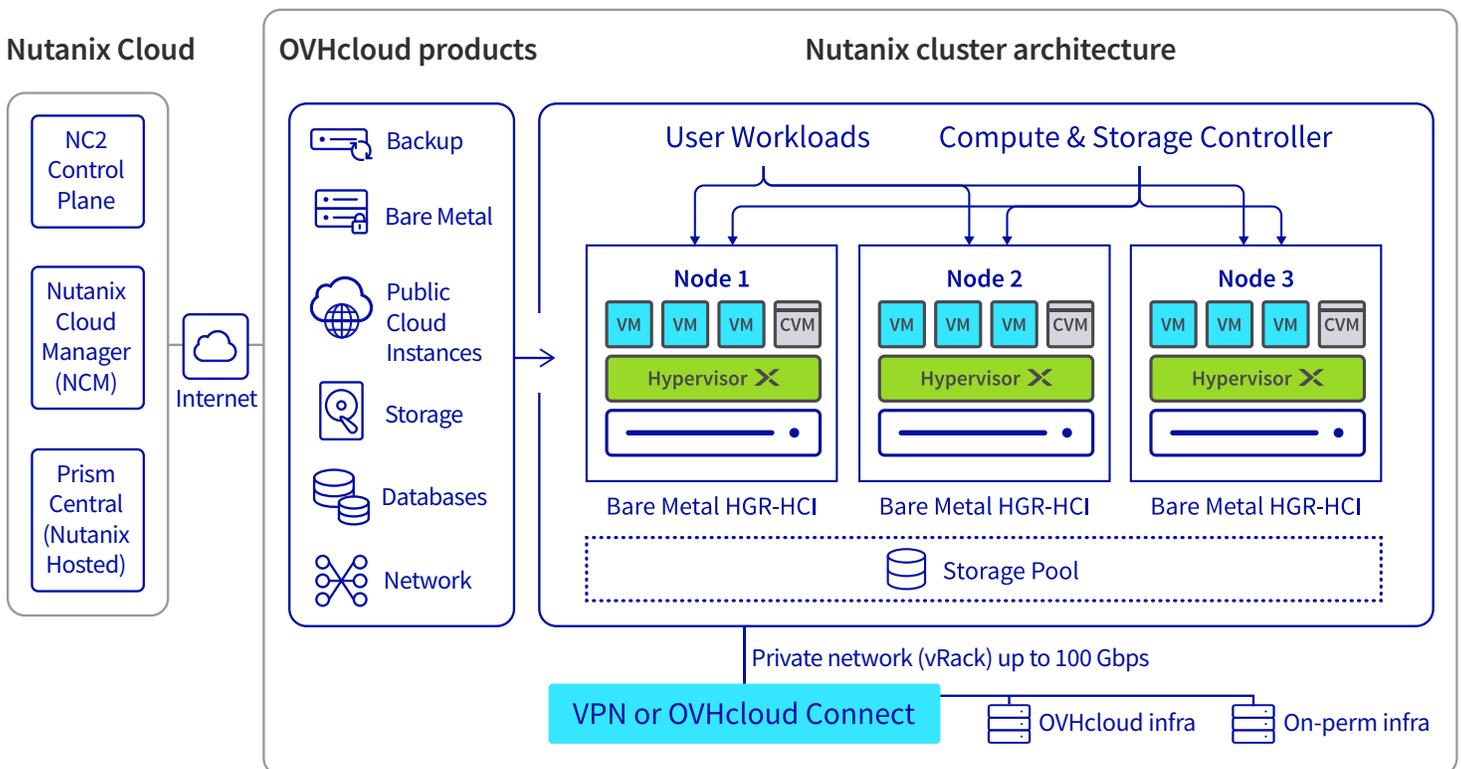

## Why consider NC2 on OVHcloud US

- Reduce hyperscaler lock-in
- Eliminate costly data egress fees
- Improve price-to-performance
- Increase hardware flexibility
- Lower DR and replication costs
- Maintain predictable infrastructure costs
- Avoid shared multitenant performance variability

## Extend the Nutanix Cloud Platform to OVHcloud

As a Nutanix Cloud Clusters partner, OVHcloud provides dedicated bare metal infrastructure that integrates directly with the My Nutanix portal. Through NC2, Nutanix automates infrastructure provisioning, deploys AOS and AHV, and manages the full cluster lifecycle while hosting Prism Central. This allows organizations to seamlessly extend their Nutanix environments into OVHcloud US regions while maintaining operational consistency, workload portability, and predictable costs.

## Use cases

### Move to Cloud

Migrate applications to OVHcloud without re-architecting or code changes.

### Data Center Extension

Extend capacity to OVHcloud while maintaining unified management.

### Disaster Recovery

Quickly build cost-effective disaster recovery sites with predictable performance and no egress penalties.

### On-demand Elasticity

Rapidly burst into the cloud to support seasonal or temporary workload spikes.

## Get started

OVHcloud is an innovative cloud provider offering Dedicated Servers, Hosted Private Cloud, and OpenStack-based Public Cloud to over 1.6 million customers worldwide for over two decades.
