OVHcloud®

Disaster Recovery with OVHcloud Powered by Zerto®

In 2021, ransomware was estimated to attack a business every 11 seconds. An attack on your organization is no longer a matter of if but when.

Champion your digital resiliency with OVHcloud in an era of widespread ransomware attacks, natural disasters and many other threats jeopardizing your business continuity. Our robust disaster recovery solution powered by Zerto is a single, simple and scalable enterprise cloud data management and protection platform. Zerto on OVHcloud delivers industry-leading ransomware protection to your OVHcloud Hosted Private Cloud to ensure your critical data and applications are reliably protected, instantly recovered and readily available.

Our disaster recovery solution reliably protects and instantly recovers your critical data and applications with just a few clicks.

Disaster Recovery with OVHcloud Powered by Zerto
Perfect for enterprises looking to modernize or set up a disaster recovery plan with a premiere data protection solution for the most demanding business continuity objectives.

- Eliminate business disruption from IT outages
- Mitigate risks of ransomware
- Ensure 24/7 data protection and recovery
- Seamless data center consolidation or migration

Benefits for Your Business

▶ Business Continuity

▶ Disaster Recovery

▶ Ransomware Protection

▶ Operational Efficiency

Disaster recovery with OVHcloud Powered by Zerto can meet the most demanding recovery objectives to help you eliminate data loss and downtime.

Achieve Business Continuity

Mitigate threats and disruptions by consistently achieving the lowest recovery point objective (RPO) and recovery time objective (RTO) with continuous data protection and instant recovery.

Boost Operational Efficiency

Seamlessly automate the tasks required for managing recovery after an incident with the RESTful API to enable IT to focus on evolving strategic priorities, all while keeping data safe and secure.

Fast and Painless Set-Up

With the help of our team and automation, your installation, configuration and migration are fast and painless. Begin protecting your organization from planned and unplanned disruptions.

Planned or unplanned, ensure disruptions don't disrupt your organization with the trusted solution deployed globally by IT enterprises.

Ransomware Protection

Neutralize ransomware threats, rapidly resume operations at scale and de-risk your recovery with the reliable failover and recovery of critical sites, applications, VMs and files in a few simple clicks.

Disaster Recovery

Have peace of mind when disasters threaten your organization with unplanned downtime. Get your Hosted Private Cloud on OVHcloud back up and running instantly in RPOs of seconds.

Seamless Cloud Migration

Migrating to the cloud can be a resource-intensive project without the right tools. Simplify your workload migration on Zerto's user-friendly platform to get your organization protected quickly.
