

Public VCF as-a-Service (VMware Cloud Foundation)

Data Sheet

Regain control over your cloud and budget. Deploy the VMware tools you already know and love in the cloud within minutes.

Public VCF as-a-Service delivers the complete VCF stack on shared, fully managed OVHcloud public cloud infrastructure in minutes. Built on scalable shared infrastructure, this solution simplifies how teams deploy, operate, and scale VMware while maintaining strong economics and architectural freedom. Organizations gain the agility to adapt as business and market needs evolve, reduce operational burden, and keep IT focused on delivering business outcomes.

Discover what's included in our Public VCF as-a-Service Standard Pack	
Compute Resource	16 vCPU & 64 GB RAM
Standard & Performance Storage	1 TB Standard storage
Public IP Address	16 IPv4 addresses
Public Network	Up to 5 Gbps & unmetered

Benefits for Your Business

Deliver the full power of VMware in a flexible and scalable model so you can seamlessly adapt to evolving business needs, simplify operations, and keep IT focused on delivering business outcomes.

Maximize performance while minimizing spend

Flexible monthly subscription and no lock-in

Complete VMware Cloud Foundation stack

Simplify cloud operations

Fully managed platform

Deploy within minutes

Run, migrate, or scale VMware workloads in the cloud—faster, easier, and fully managed by OVHcloud.

Manage Cloud Costs

Run production VMware workloads in the cloud at a lower, predictable cost without hyperscaler lock-in. Keep familiar tools and performance while gaining flexible scaling, transparent pricing, and fully managed operations.

Extend Hybrid Cloud Capacity

Scale VMware capacity instantly without buying new hardware or changing how you operate. Extend on-prem environments into a fully managed cloud with predictable pricing, private connectivity, and zero retraining.

Plan for Disaster Recovery

Recover faster from outages, cyber incidents, or site failures without building a second data center. Use a secure VMware cloud as your DR target with rapid recovery, lower infrastructure costs, and operational simplicity.
